

NSSE 2016

Administration Summary

Eastern Kentucky University

Administration Summary

This report provides an overview of your NSSE administration, including details about your population and sample, response rates, representativeness of your respondents, survey customization choices, and recruitment message schedule. This information can be useful for assessing data quality and planning future NSSE administrations.

Population and Respondents

The table at right reports your institution's population sizes, how many students were sampled (whether census-administered or randomly selected), and how many completed the survey.

Survey completions	<i>First-year</i>	<i>Senior</i>
Submitted population	2,255	4,083
Adjusted population ^a	1,882	3,064
Survey sample ^b	1,877	3,053
Total respondents ^b	461	788
Full completions ^c	368	690
Partial completions	93	98

- a. Adjusted for ineligible students and those for whom survey requests were returned as undeliverable.
 b. Targeted, experimental, and locally administered samples were not included.
 c. Completed at least one demographic question after the core engagement items on the survey.

Response Rate and Sampling Error^a

The table below summarizes response rates and sampling errors for your institution and comparison groups. For more information see NSSE's Response Rate FAQ: nsse.indiana.edu/pdf/Resp_Rate_FAQ.pdf

	<i>First-year</i>				<i>Senior</i>			
	EKU	Southeast Public	Benchmark Inst.	Nationwide	EKU	Southeast Public	Benchmark Inst.	Nationwide
Response rate	25%	19%	18%	18%	26%	21%	20%	20%
Sampling error ^b	+/- 4.0%	+/- 0.8%	+/- 1.1%	+/- 1.0%	+/- 3.0%	+/- 0.7%	+/- 0.9%	+/- 0.9%

- a. Comparison group response rate and sampling error were computed at the student level (i.e., they are not institution averages).
 b. Also called "margin of error," sampling error is an estimate of the amount the true score on a given item could differ from the estimate based on a sample. For example, if the sampling error is +/- 5.0% and 40% of your students reply "Very often" to a particular item, then the true population value is most likely between 35% and 45%.

Representativeness and Weighting

The first table at right reports on variables submitted in your population file. Respondent and population percentages are listed side by side as a convenience to see how well the characteristics of your respondents reflect your first-year and senior populations. For more respondent characteristics, refer to your *Respondent Profile* report.

NSSE weights results by institution-reported sex and enrollment status so institutional estimates reflect the population with respect to these characteristics. The second table at right provides the respondent and population proportions used to calculate your 2016 weights. For more information, see nsse.indiana.edu/html/weighting.cfm

Representativeness

	<i>First-year</i>		<i>Senior</i>	
	Respondent %	Population %	Respondent %	Population %
Female	67	58	66	58
Full-time	98	97	84	76
First-time, first-year	97	96	N/A	N/A
Race/ethnicity ^a				
Am. Indian or Alaska Native	0	0	1	0
Asian	2	1	2	1
Black or African American	4	5	4	4
Hispanic or Latino	3	3	3	2
Native Hawaiian/Other Pac. Isl.	0	0	0	0
White	86	86	86	86
Other	0	0	0	0
Foreign or nonresident alien	0	0	0	0
Two or more races/ethnicities	4	3	2	2
Unknown	2	2	3	4

- a. Based on the IPEDS categories (not available for Canadian institutions) submitted in the population file. Results not reported for institutions without full (at least 90%) race/ethnicity information in the population file.

Weighting

	<i>First-year</i>		<i>Senior</i>	
	Respondent %	Population %	Respondent %	Population %
Full-time, female	66	57	55	44
Full-time, male	32	41	29	33
Part-time, female	1	1	11	14
Part-time, male	1	1	5	9
